User eXperience/User Interface

PayPaisa is an easy to use, peer to peer payment application. It is used for sending and receiving money to and from your mobile number.

Lernito

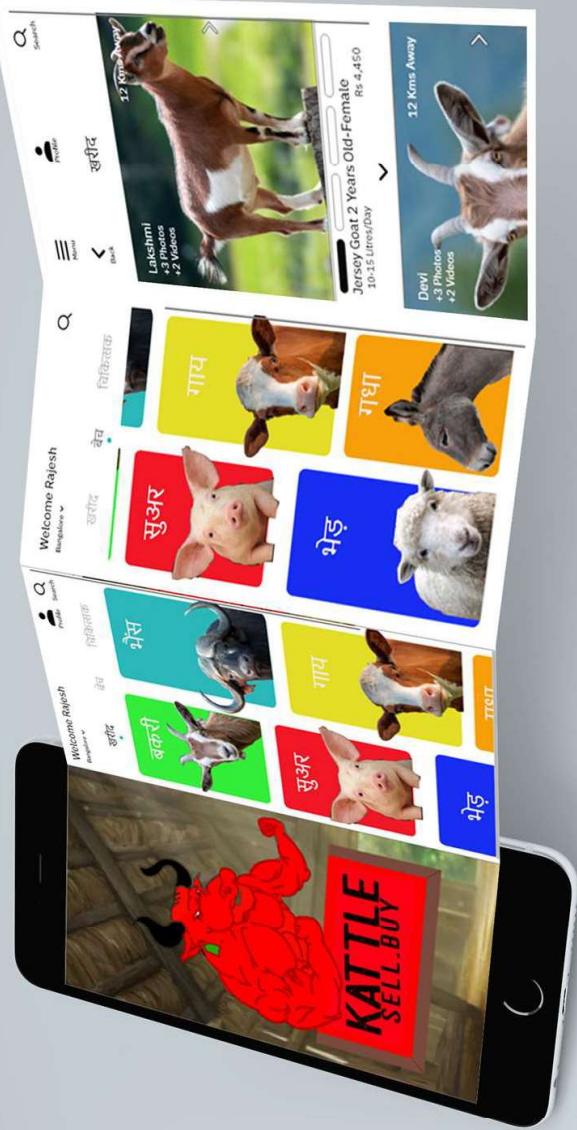

Lernito app is designed to help aspiring learners discover and get in touch with the best institutes and equip them with the information about the quality of education at these institutes by giving them access to rankings based on community reviews. It can also give career counselling and in-depth details for every course they desire to pursue. For the institutions listed on the app, it is an opportunity for targeted lead generation and getting feedback from their students.

Kattle

Kattle App is an easy to use, Trading app for selling and buying Cattles. It has easy options to choose for people who cant read or understand English and voiceover to guide illiterate customers. With simple options and easy sort and filter, and pleasing UI, this app design could be of great use to the customers.

From splash screen design to complete UI tools used
Adobe XD
Adobe Illustrator

Other ways I can help you

Way 1

Being able to communicate effectively is one of the most important life skills. I have very good communication skills and hence would be an excellent team addition

Way 2

Having worked in different sectors, I have way with people and the ability to blend in. Despite not liking engineering background much I still managed to win several awards from organisations, so imagine what I will do for my passion.

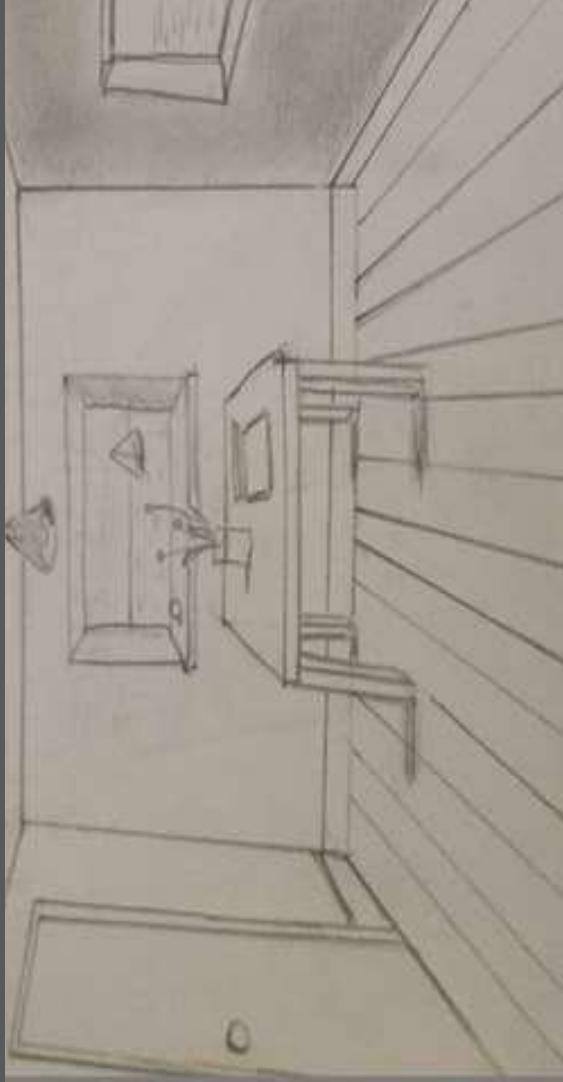

Way 3

I am avid reader and artist with excellent drawing skills and own a wacom tablet. My interest in books and drawing comics show my creative side which will add value to your team and organisation.

Hand drawn illustrations
